

## Adds Zest to the Meal

# "SALAD" TEA

### To Burn Or Not To Burn

There will be few people in Western Canada, whether farmers, business men or wage earners who will quarrel with the policy which resulted in the announcement of the Canada Grain Board's establishment of a minimum price of 87½ cents for No. 1 Northern wheat at Fort William.

Regardless of political affiliations or economic beliefs the general public in the west greeted the announcement with approval as soon as it was made and, it is to be hoped, it will be accorded general backing in the east as well.

But the extent to which this policy will ensure to the benefit of Western farmers, who are hard pressed as a result of a prolonged period of drought, followed this year by a most disappointing situation as a result of wide-spread ravage of the wheat crops by rust, will depend upon the price spreads which, at the time of writing, are expected to be announced any day.

As harvesting and threshing operations progress, the amount of damage from rust is being daily revealed as a disaster of immense proportions, and while estimates of the extent of the loss sustained by farmers in Manitoba and Saskatchewan vary from day to day, it is quite apparent that the final figures will show a loss of great magnitude.

The rust which invaded large tracts of the best wheat growing areas of the west with such devastating effect, has not only reduced yields of what earlier in the season promised to be abundant crops but it has depreciated the grades to an extent comparable with the lowered yields.

At the moment there are thousands of acres of low grade wheat standing in the field awaiting the time when the grain is sufficiently dry to ensure a good burn because it does not pay to cut it.

Before taking this drastic action to destroy a lot of grain which conceivably may be of some value at a future date, farmers would be well advised to at least await the promised announcement of spreads prices. It is quite possible that the spreads may be set at such figures that even the lowest grade wheat can be threshed and stored on the farm without too serious loss to the grower.

The Federal government has recognized the loss sustained by farmers through drought in the past few years as a national calamity and it is surely reasonable to suppose that the loss from rust this year will be regarded in the same category and that recognition will be given to the fact when minimum prices for the lower grades are set.

No one can gainsay the statement that the blame for damage by rust is laid at the farmer's door. Rust damage is just as much a national calamity as the drought loss of recent years and, this being the case, there is every reason why the national price strings should be loosened to relieve the predicament in which such a large number of Western farmers find themselves with winter knocking at the door.

It must be remembered that the grain about to be delivered to the flames has already cost the farmer something in outlay and labor and would cost more if it were cut, threshed and hauled to the elevator.

Unfortunately the present market price is too low to cover all these costs, without taking into consideration any margin of profit for the farmer who raised the grain.

If the crop is destroyed by fire not only does the grower lose what he has already put into it in cash and labor, but it represents a loss to the country at large. It might be well worth the country's while to advance the farmer at least sufficient money to save the grain by way of a fixed minimum price, thus salvaging what has already been spent on the crop and perhaps saving what might otherwise have to be expended later in the form of relief.

Such a measure might well be regarded in the light of a partnership between the individual and the nation for the mutual benefit of both.

There is also the question of the effect on the morale of the unfortunate grower. After losing a series of crops from drought the economic necessity of burning a crop which was not very long ago so promising must have a disheartening effect on the student of the farm. If this effect can be averted without serious financial loss to the country, it may be well worth the expenditure.

### Flies Prefer Orange Color

#### Primrose Yellow Is Second Choice

And garnet third.

It's this way with flies—they'd rather sit on an orange than a cucumber, if the choice depends on color. Such was the deduction announced at the University of California recently as a result of scientific observation of color preferences of multitudes of flies. A huge checker-board with eleven-inch squares in various colors was hung up in a dairy barn of the university's college of agriculture. The flies were invited to come and make themselves at home. For three months this went on while Lester J. Berry, graduate student in charge of the experiment, and his aides kept watch. The tabulated results, snapped by Berry follow: Not less than 10,975 flies parked on the orange square while only 2,067 sought out the green. Primrose yellow drew 6,541; carnation, 4,415; light blue, 3,480, and white, 2,360. More catholic flies went after coral red and pink.

### Sandwich Man In Hawaii

#### First One To Be Seen In Honolulu Amazed Crowds

Honolulu, where out-door advertising is unknown, gaped in amazement at its first sandwich man while police thumbed hurriedly through city ordinances and territorial laws searching in vain for a legal pretense to remove him from the streets.

The man, with signs advertising a shoe sale strapped to his back and chest, ambled calmly through downtown thoroughfares while crowds collected.

Someone called the chamber of commerce protesting the anti-billboard law was being violated. The chamber called police, who worried over whether a billboard is still a billboard if it walks.

Finally they asked the sandwich man to get off the streets, charging he was obstructing traffic. He obliged but officials, after further research, admitted they could find no Hawaii law to prevent his return.

**Civil Service Betterment**

Given the full co-operation of civil service organizations and the civil service generally, Charles H. Bland, chairman of the civil service commission at Ottawa, expressed confidence that betterment of conditions of government employees would come in the future.

### Russia Has Human Crane

#### World's Strongest Man Loads Trucks In Soviet Factory

The Soviet Union claims the world's strongest man in Grigori Gilkin, who now works as a "human crane" in the Stalin automobile plant at Moscow—loading trucks, moving heavy machinery and lifting weights that some times amount to five tons—far beyond the ability of champion circus performers.

So valuable is Gilkin's strength to the Soviet, however, that he never has been allowed to display his ability on the stage. For several years now, the government has moved him from post to post, to do heavy labor as a "shock worker" in plants where reconstruction was going on or where production had fallen behind the official plan.

"Occupation: Strong man," is the inscription on Gilkin's passport—the identification card that every Russian citizen must carry.

When his strength was first discovered, scientists examined him and prescribed a special diet for him—far beyond the rations issued to the ordinary Soviet worker.

Every month, Gilkin is supplied with 60 pounds of meat—two pounds a day of the delicacy that most middle-class Reds see perhaps once or twice a week. Besides, he rates 24 pounds of butter, 20 pounds of sugar, 40 pounds of fish and 40 cans of preserves.

He eats six pounds of bread a day—three times the amount that used to be allowed to workers before the bread ration system was abolished.

Gilkin's phenomenal strength was discovered when he was 15 years old. Near the village in which he lived, a forest ranger had been pinned beneath the trunk of a fallen tree. Unaided, Gilkin lifted the log, weighing between 900 and 1,000 pounds.

Gilkin was sent to Kiev, where he worked in the arsenal and where, as his strength increased, he proved able to move weights up to two tons. Later, he was shifted to Taganrog, in the coal district of the Don basin and later to the Kirov plant.

It was by special order of Ordzhonikidze, commissar of heavy industry, that he was finally brought to Moscow to help with his overgrown muscles in the reconstruction of the Stalin factory.

Gilkin, dark-haired and pleasant-faced, shows no particular evidence of his tremendous strength at a casual glance. Now 37 years old, he weighs about 250 pounds and stands just six feet tall.

So far scientists can discover, the strong man inherited his ability from his mother, who was a wrestler in a travelling circus before the revolution, and who lived to 70 years of age.

Apparently, his strength will be passed on to a third generation. Gilkin's son, three years old, is already three feet six inches tall and can lift 40 pounds without difficulty.

To foster the boy's strength special rations have been granted him. The boy eats 100 eggs a month as well as 20 pounds of meat and six pounds of butter.

### Dogs Have Common Sense

#### Show Much More Intelligence Than Man

In Chicago two scientists made an intelligence test of a dog, using a device called psycho-galvanometer. It proved, they said, that the dog had as much sense as a 12-year-old child. That will be no startling announcement to dog lovers. Most of them will declare the machine ought to have shown that the dog has more sense than most human beings of any age.

A better comparative demonstration would prove that (1) a dog will not eat when he is not hungry; (2) a dog will relax and rest when he has nothing to do; (3) a dog is true to his instincts and profits by his experiences; he doesn't do a thing that got him into trouble the first time.

In most of these tests the average human being would make a poor showing.—Detroit News.

### A Novel Timepiece

#### Viennese Woman Made Unique Clock For Pope Pius

A unique clock which tells at a glance where masses are being held in all parts of the Roman Catholic world has been presented to Pope Pius by a Viennese woman.

The face of the clock is a facsimile map of the world, with a lighted by a small electric lamp. The clock, the work of a young Viennese girl, is about two feet tall and took more than a year of patient labor to complete.

In addition to being able to see where masses are being celebrated, it's holiness can learn the time, the date and the phases of the moon.

### Would Increase Sales

If every little market in the land and every large one, could furnish its customers with top quality eggs, which could be bought with assurance just as good milk can be had at every corner store, we have no way of estimating what a benefit every producer of eggs would receive.

The great problem of taxation is how to make the other fellow pay.

A fly will travel 30 miles in search of food.

### FASHION FANCIES

SKIRT, BLOUSE, JACKET SUIT—DAUGHTER JUST AT AGE TO APPRECIATE SOMETHING SMART FOR FALL DAYS

By Ellen Worth.

Growing daughter will just adore a little three-piece suit like this for first fall school days. It's so very practical, too, besides being smart! Brown and aqua checked angora woolen made the model pictured. The detachable collar and cuffs of the jacket, matched the plain brown wool jersey blouse. Plain aqua blue cotton broadcloth blouse would also be lovely by way of a change.

Twenty cotton in dark blue is effective with plain bright red cotton used for the blouse, collar and cuffs with 1 yard of 4-inch ribbons for bow.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Our Fashion Magazine is beautifully illustrated in color. Send for your copy today. The price is 10 cents.

### Dogs Must Be Protected

#### Labrador Patrol To Teach Eskimos They Cannot Be Abused

One of the tasks of the new Labrador police patrol, travelling over 1,200 miles of the most hazardous trail known to civilization, is to teach the Eskimos and Nascope Indians that dogs have rights under British law.

Cruelty to the animals is common, the tribesmen always having believed anything that was their own property was to be treated as they wished, and some resentment was shown at first when the police began to impose restrictions.

Punishment inflicted upon a number of owners following the convictions brought about a better understanding, however, and the officers are finding it easier to enforce the "Cruelty to Animals Act."

Willing slaves to their masters, the Labrador dogs are the sole means of transportation and the very life of trade along this rugged coast in winter, depended upon by Eskimos, Indians and white men.

The police use dogs to carry on their patrol, which extends from Hopetown to Cartwright over the trail route, thence to Nebrun and return to Hopetown.

### Infant Prodigy

#### Twenty Months Old Child Has A Vocabulary Of 1,100 Words

Little Jackie Grub, who can rattle off more words and sentences than a youngster three times his age, said "holy smokes!" and set about showing Dr. Bryng Bryngelson of Minneapolis, how a left-handed 20-month-old boy speaks the English language with the 1,100 words he knows. When he got through it was Dr. Bryngelson, director of the University of Minnesota speech clinic, who said, "Holy smokes! He is distinctly a genius at 20 months."

### Manitoba Survey

#### Shows 52,100 Farmers Operating More Than Ten Acres

In a recent survey made by the Manitoba Department of Agriculture it was found that there were 52,100 farmers operating farms of more than 10 acres in Manitoba. The survey further showed 297,000 horses in the province, an increase of 1,000 from last year, which was the lowest for 22 years; 218,000 sheep, approximately the same as for the last six years; 118,000 swine, the lowest figure at this time of year since 1910.

### Buried Eloquence

The mayor had just laid the foundation stone of a new wing for the hospital, and the spectators awaited his speech.

"What can I do?" cried the harassed mayor to his wife. "I've laid the stone on top of it."

The most useful citizen is the one who creates most jobs.

### Bomb Shelter De Luxe

#### City Of Paris Making Provision For Air Raids

Thirty feet under the ground in the Avenue Foch, one of the most fashionable residential streets in Paris, a model concrete shelter has been constructed for use in the event of air raids. The shelter consists of several rooms equipped with all conveniences, including apparatus for detecting the presence of poison gas outside. It will serve as the model for many more which are to be built by the city of Paris. It is built under a mansion. The roof is a block of concrete six feet thick. Above this is 10 feet of earth then a one-foot thick block of concrete, and finally another layer of earth. Two stairways lead to the shelter, and at the foot of each is a steel and concrete door weighing a ton. There are special rooms for giving first aid to injured persons, machine rooms for light and ventilation purposes and storerooms. Although it is connected with the city's regular light supply, the shelter is equipped with generators and batteries for providing its own light if necessary.

### China Has New Tax

#### After Next May Those Who Cannot Read Will Be Fined

China has announced that after May 1, 1936, anyone in Nanking between the ages of six and fifty who cannot read will be fined. Appalled at the ignorance of the people of the capital, the Chinese authorities have issued a primer of 100 characters and ordered students to teach the ignorant from it or give up hope of graduation. As half the population of the city cannot read, the students will be kept busy until the new law goes into effect. The police will be the official examiners, and will stop anyone they wish who if he fails to read the primer, will have to pay the equivalent of half a cent on the spot. The penalty is called the Ignorant People's tax.

### Discovery About Artist

#### Michelangelo Had Hundreds Of Concealed Faces In His Paintings

A discovery that hundreds of concealed faces look down from Michelangelo's paintings in the Sistine and Pauline Chapels of the Vatican has been made by a Rome priest and art critic, Father Giuseppe Parroni. It was in this way, Father Parroni says, that Michelangelo piloried his enemies or immortalized his friends. Cardinals and some of the great men of the papal court figured among Michelangelo's enemies. Father Parroni mounted a tall scaffold and took minute photographs to complete his discovery.

### Parliament In Jerusalem

#### Arabs Expect Early Establishment Of Council In Palestine

Early establishment of a legislative council in Palestine is considered by certain Arab leaders as merely awaiting a British "Order in Council" establishing the parliament before disclosing their position. It was stated by Mirat-Ash-Sharara, secretary of the Arab League, that under no conditions will they accept a legislative council at this time.

### Prince Starts New Fashion

The Prince of Wales started another craze in men's fashions when he appeared on the waterfront at Cannes, France, with a pleated cord belt fastened with a five-inch anchor. Dealers, swamped with orders, rushed demands to Paris wholesalers for thousands of similar belts. The heir to the British Throne wore the belt with a white sport suit.

It's bigger! It's richer! It lasts longer, too. This slow-burning Dixie Saves money for you.

### Safety Campaign

#### Automobile Fatalities On Roads In British Isles

Bad as the slaughter on the roads continues to be, we do not think there is any ground for the gloomy view that the safety campaign is more or less played out. It takes a long time to build up the habit of self-protection amid the dangers of the road, says the London Daily Herald.

The fact that fatalities and injuries are below those of last year is pretty convincing proof that safety habits are gaining ground, and there is no good reason whatever for believing the improvement has ceased. Indeed, the ministry of transport's analysis of accidents by age-groups indicates once again where education and propaganda should be directed with special energy. Only one-sixth of the killed were 15 to 24. One-third were over 55.

One half—a tragic figure—were under 15. It is clearly the young and the old who are in the greatest danger, and upon them should be concentrated the warnings and instructions of the campaign.

### Jelly-Fish Kills Man

#### Sting Of Giant Type Proved Fatal To Italian

A sting by a giant jelly-fish has resulted in the death of Salvatore Cantarella, an Italian cane farmer near Brisbane. He was bathing at Coogarra Beach when he suddenly cried out loudly for help. His companions rushed out and pulled him ashore. He was given artificial respiration and restoratives but in vain, and he died on his way to the hospital. Tentacle marks were found on his body and it was at first thought that he had been attacked by an octopus. Later, however, it was found that he had been paralysed by a giant "Portuguese Man of War," a type of jelly-fish that is found along the Queensland coast. These jelly-fish often have tentacles up to 12 feet long, and their sting is capable of causing temporary paralysis.

Don't forget that an honest man never has to proclaim the fact.

### Lost Books Found

#### Volumes Missing For 41 Years Returned To Prince Albert Man

Two books which Alderman G. H. Carr of Prince Albert believed he had lost in Greenland 41 years ago when a member of Admiral Peary's 1893-94 North Pole expedition, turned up recently—in the mail.

Mr. Carr was notified a parcel of books awaited him at the customs office. On opening the parcel he discovered his two volumes of Stanley's "In Darkest Africa," which he had read during the long Arctic night while the polar party waited to begin the fabled dash for the North Pole. They had been discovered among Peary's effects and forwarded by the admiral's daughter, Mrs. Edwin Stafford, of Washington, D.C.

### Large Sum For Relic

#### Pusey Horn Belonging To King Canute Sold In London

Symbolizing the holding of land by the tenure of the horn, or corneage, the Pusey Horn, a remarkable relic of King Canute was sold recently in London for \$8,500. It was a heirloom of the Pusey family. In 1865 there was a dispute in the courts for the possession of the Pusey Horn. It was produced and identified as the one by which Canute conveyed the manor of Pusey (Berkshire) 700 years before. The horn was the alarm to be given on the arrival of the King's enemies. It will go into a private collection of antiques.

### A Good Suggestion

The young bore at the party, who was doing his share of the entertaining, had already exceeded the time-limit.

"Now, continuing my imitations," he said, "I can mimic any bird. Will somebody name a bird, please?"

"A homing pigeon," suggested one of the company.

A species of honey-making wasp is found in Mexico and the southern part of Texas.

Some varieties of softwood are harder than hardwood.

### NATURE'S OWN SALT-TREATED SPEEDWAY

While Canadian engineers and research scientists have been working out methods of creating good highway surfaces by treatment with common salt, the world's most famous race-drivers have turned to natural salt-treated speeds for their world record attempts. Photo shows a stock car speed test on the new speedway of the great salt desert in Utah where Sir Malcolm Campbell in his famous Bluebird set a new world's record and bettered 300 miles per hour.

## History of The Parish St. Cyprian's, Lacombe

Great distances separate Africa, Alaska, and Lacombe. Africa was the scene of the labor of St. Cyprian, the Bishop of Carthage, who was a Martyr in the cause of Christianity in the year 258. A.D.

In far-off Alaska there is one who is still an active laborer in the Master's Vineyard, under the banner of that part of the great Church Catholic known as the American Episcopal Church. This laborer is none other than the Venerable Archdeacon Frederick W. Goodman.

Archdeacon Goodman came to Lacombe on Sunday morning, April 1st, 1894, and held his first service in this place in the old Log School House, which still stands, though sadly dilapidated, on the Eastern outskirts of the town. The late Colonel Gregory and H. C. Bowland Esq. were the Church Wardens at this time. The Rev. Rodrick Terry was Archdeacon Goodman's predecessor, and he was responsible for the organization of a Parochial Corporation. May we quote from Archdeacon Goodman's letter of May 6th, 1912, in which he says: "Years before that (1893) when I was not yet a priest, I was called to Lacombe to visit all that section. He may have held the first service in Lacombe. The Presbyterians had a Missionary named Robertson who did the same thing. When I arrived at Lacombe it was a very small village. The Presbyterians were the most numerous, and John Fernie was their Minister. New settlers came during the summer of 1894, and also a Methodist Pastor named Cheyney. He was a fine, young fellow. The Methodists bought the house belonging to William Fernie for a Parsonage. Neal was one of our people, but he had a homestead near Griffin River, and went to live on it."

There are a great many wide gaps in the only available historical data of the Parish of St. Cyprian, Lacombe; and the Rev. Rodrick Terry found it extremely difficult matter to make a proper compilation in his chronological order. The deed which makes the formal establishment of the Parish bears date of May 16th, 1894.

St. Cyprian's Church edifice was built in the year 1902, and was formally opened by the late Bishop Pinkham on December 22nd of that year. The Rev. F. G. Rickard was the incumbent at that time. Rev. Rickard is still an active service in Ontario.

Rather unfortunately, perhaps, for those who have been instrumental in continuing the work, the church was built without a foundation. Several attempts have been made over a long period of years to complete this work, and it is only now that this is actually being done. Some ten or eleven years ago, during the incumbency of the Rev. W. J. Hickin, a Chancel was added and placed upon a "surface foundation" of concrete. This portion of the Church was consecrated in November, 1928.

In June of this year, a committee, known as "The St. Cyprian's Church Fund Organization" was formed, and with Mr. H. Leslie Peary as chairman. The original and specific duty of this committee was to canvass for funds. On June 30th, when this committee made an interim report, the parishioners authorized the enlargement of the committee; and the setting up of two sub-committees, one of which was to attend to the matter of "Publicity and Propaganda."

Messrs. Abbott and Hansen of Edmonton and Lacombe are the general contractors, and two contracts have been awarded to them. The first is for work on the interior of the church, while the second includes the foundation and basement. Art Dwan is the sub-contractor for the excavating. He is in turn, "subbed-off" to Charlie Miller, the actual digging, which has just now been completed.

Messrs. Robson, Thompson, Owen, and the incumbent, comprise an executive body of great importance to the finalizing of all arrangements with the contractor, to supervise the work, and to authorize all payments from the church fund. The whole undertaking must be fully cleared up not later than the end of 1936.

At the present time extensive work is being done. The interior of the church is being replastered and completely redecorated and renovated. A large size chimney is being built. A full-size basement and concrete foundation are being placed under the whole edifice. The total cost of this work amounts to \$125,500. Later on, a central heating plant will be installed, and many other improvements made. The Bishop is expected to be here to dedicate the present improvements at 11 a. m. on Sunday, November 10th. We hope to have our church returned to us by the Rev. Rodrick Terry by October 1st, 1937, when we expect to hold our Annual Harvest Thanksgiving Services. Proper notification of this will be given in the near future.

We give below as complete a list as we can of the many incumbents who have been in charge of this parish. It is not possible to give exact dates in all cases. The Rev. Rodrick Terry 1893-94

The Rev. F. G. Rickard 1900-02  
The Rev. W. R. George 1902-04  
The Rev. J. Leach Porter 1904-05  
The Rev. G. C. Edwards 1905-06  
The Rev. R. A. Robinson 1906-10  
The Rev. A. J. Patterson 1910-16  
The Rev. Henry Austin 1916-19  
The Rev. Andrew Love 1919-23  
The Rev. W. S. Hutton 1923-26  
The Rev. G. J. Fielder 1926-27  
The Rev. T. H. Chapman 1928-30

There was an interregnum of some eight months between the transfer of the Rev. G. J. Fielder to Rimby in 1927, and the arrival of the present incumbent in July 1928. He came from an important parish in the Diocese of Nova Scotia, solely on account of his health and the very definite orders of two medical advisers. Much has been accomplished in certain phases of the work during the past seven years, but more yet remains to be done before one could properly say that the church in the parish of St. Cyprian, Lacombe, is fulfilling its mission in the way in which it should. That is the task which lies immediately before us today. It is our united task. Let us do it together.

**ACCIDENTLY SHOT  
PONOKA BABY DIES**

Struck in the forehead by a bullet from a .22 rifle fired by her brother, Emma, four year old daughter of Mr. and Mrs. Rod Lewis, who live six miles northeast of Ponoka, was accidentally killed last Thursday afternoon. The boy had just returned from school, picked up the rifle, and, not knowing it was loaded, pulled the trigger with fatal results. Dr. M. Graham decided no first aid was necessary, and the very young girl was taken to the parents and family, over the sad occurrence.

**Brothers Meet  
After 35 Years**

To meet his brother whom he had not seen for 35 years was the experience of James Henderson of Rimby last week end, when his brother Charles Emerson Henderson of Woodstock, Ont., paid him a surprise visit.

Just 35 years ago, immediately after his mother's death in Ontario, James Henderson decided to come West, and finally located at Rimby. After teaching schools in Woodstock for 40 years, Charles was superannuated two years ago, and spent last year in California. He is 65 years old, while his brother James is 62 years of age, and both enjoy good health. C. E. Henderson returned east last Monday.

**Frolic Arranged  
For Hallowe'en**

Further plans for the Hallowe'en Frolic to be held on Thursday, October 31st, were arranged by the Social Committee at the regular meeting of the Women's Institute on Saturday afternoon. Mrs. Dunphy's home. Holder of the lucky admission ticket will be given a prize, the draw to take place at midnight.

"What Is the Housewife's Leisure Worth?" was the topic of a splendid paper read by Mrs. K. Hoppus. Women would derive much profit intellectually and physically, if instead of devoting their leisure time to bridge, etc., they would pursue some hobby, such as, for instance, gardening, interior decorating, making a study of, and filing designs upon, a subject in which they might be particularly interested, such as china, rugs, pottery, paintings, musicians or any one of countless other subjects.

A second chapter on the booklet, Moving Pictures and Morality by Mrs. C. Todd.

A feature of the September meeting to be held at the home of Mrs. Henry Howe, will be a surprise box. Each member brings an article valued at about 10 cents, which is placed in the surprise box. Members are then expected to purchase articles at a price of 19 cents. Proceeds will go to augment the W. I. Fund.

**Visitor to Lacombe Dies Suddenly**

Mrs. Vera Hawk, of Parkland, Alberta, passed away at the home of Mr. and Mrs. A. E. Reeves, where she had come for a few days visit at 11:15 Wednesday evening, September 2, 1935, following a sudden illness.

Mrs. Hawk, who was 80 years of age, had travelled as far as Lacombe with her daughter, Mrs. S. Souther, who was on her way to attend a W. C. T. U. Convention in Red Deer. They arrived on Tuesday evening, and early Wednesday morning, Mrs. Hawk was taken violently ill. Dr. C. T. Hyman was called to the daughter of Mr. and Mrs. Reeves. Mrs. S. Edmunds, motored to Red Deer and brought back Mrs. Souther. The body has been taken to Parkland for burial in the family plot. In addition to the daughter, Mrs. S. Souther, two sons, Walter and Hugh, reside in Parkland, a grand-daughter, Mrs. Loretta Kutsen, in Calgary.

## Crop Report

Through their branch Managers who have an intimate knowledge of their respective local situations, the Bank of Montreal has released a crop report, details of which follow: For the three Prairie provinces, together with a brief general report.

**General.**—Wheat threshing is nearing completion in the Prairie Provinces except in northern and central Alberta, although harvesting operations are being delayed by unsettled weather; recent estimates from authoritative quarters place the approximate yield at from 272,000,000 to 284,000,000 bushels, the crop varying greatly as to grade. In Quebec crops in general throughout the Province are proving satisfactory in yield and quality. In Ontario good crops have been harvested with those of hay, alfalfa, and clover abundant. In the Maritime Provinces operations have been delayed by wet weather, and in general results are but fair, with the exception of apples, which to date indicate a crop well up to average and of good quality. In British Columbia the principal crops are satisfactory as a whole. Details follow:

**Prairie Provinces.**  
Alberta.—Threshing has been completed at this time by Mr. D. J. Dwan, a high grade, what has been harvested. Operations are under way in the northern and central districts, where returns in hand are as follows: Wheat, 272,000,000 bushels, a fair crop and free of plentiful.

**Saskatchewan.**—Threshing operations generally are nearing completion. The wheat crop varies greatly both as to yield and grade, with the major portion in the lower grades. Coarse grain, such as barley, rye and feed is sufficient in nearly all districts.

**Manitoba.**—Threshing operations are generally well advanced. The wheat crop generally is light and of low grade, with only a small portion worth harvesting in any quantity. Heavy rains are a fair crop and free of plentiful.

**Many Attend  
McDonald Shower**

On Friday evening a number of friends gathered at the home of Mr. and Mrs. McDonald to honor a recent bride, Mrs. Leonard McDonald (nee Hazel Christie). Much to the surprise and amusement of the guests, the bride was presented with useful gifts of every description. A jolly evening was climaxed with a delightful lunch.

The following attended: Mrs. R. B. Thompson, Edith Thompson, Fay Thompson, Helen Cameron, Mrs. M. D. E. Perkins, Myrtle Breck, Evelyn Breck, Alvin Breck, Billy Umbreit, Pat Reddick, Jessie Reddick, Gladys Reak, Mrs. Umbreit.

**MOTOR ASSOCIATION WARNS  
DRIVERS OF CARBON MONOXIDE**

At this season of the year and later on, motorists are urged by the Alberta Motor Association to give greatest care to driving precautions. Not only should the driver be careful to avoid accidents from skidding or running off the road, but should be mindful of the deadly carbon monoxide fumes that lurk in some garages.

Each year, often beginning with the fall, several hundred people in Canada and the United States lose their lives from carbon monoxide in their cars. Alberta is on the list which shows the heavy toll all over this country annually.

Deaths usually occur as the result of a car being operated within a garage with closed doors, often unintentionally.

When a test was held recently it was found that approximately one-half of the vehicles contained varying quantities of carbon monoxide. This should be a warning to all to the presence of any carbon monoxide in the car is clear proof that a defective carbon engine exists.

The Alberta Motor Association urges that car conditions should be checked in order to eliminate such hazards as carbon monoxide, faulty connections, together with a similar inspection of floor boards and bulkhead.

**SUCCESSFUL TEA**  
On Saturday afternoon, Sept. 28, a tea, which was largely patronized, was held at the home of Mrs. H. M. Jones, in aid of the restoration fund of St. Cyprian's Church.

**LEAVES FOR TORONTO**  
Miss Jean Minkler left Sunday for Toronto, where she has received a position as stenographer in the head office of the United Church.

All new and prospective Lady Bowlers are invited to leave their names at the Lacombe Bowling Alley. Ladies' Bowling League starts October 15. Good entry always received.

**TO THE ELECTORS**  
Federal Constituency of Wetaskiwin

**LADIES AND GENTLEMEN:**  
If you MUST pay Party Politics, wait till after Election. You cannot afford the game now. Meantime you your common sense. You voted Party in 1926 and 1930, and you got depression. You voted for yourself in August, and it again in October. Can Mr. King bring Prosperity? Can you lift yourself with your own bootstraps? Why did you put Mr. King out? Because he led you into depression and did not know where there was a dividend. That is his position today. Politics means nothing but politics; they forget nothing but you. U.F.A., C.C.F., Socialists, Labor, Reconstruction, Communist, an unholy alliance. But, adversity makes strange bedfellows. Finance again shows it's hand. Remember the advice of the Economic Safety League?—"Vote for any party but Social Credit."

Can free trade cure you? England was FIRST to feel the depression, under free trade; and the first to improve under protection. Tariffs, high or low, merely "Heads I win, tails you lose", under orthodox finance. No country can afford to consume its own products, hence, drive for foreign markets, leading to war. But if we cannot afford to consume what we produce, neither can we afford to consume the imports in exchange for exports, hence need for tariff.

If your money decreases—you feel depressed, if every one's money decreases—you are depressed. If money is increased, so is debt, to a still greater extent. Financial policy, nothing but a game of chance; financial policy, and nothing else, can end it. Orthodox finance got you into debt and must, in the end, bring you to bankruptcy. Is Mr. King orthodox? Remember Buchanan. Will he help Alberta? He will not. He will not lead you to ruin. He may KNOW everything but he understands NOTHING! How to fool you. This time fool the Politicians and his financial bosses by voting for Social Credit and your self. OTHERWISE Fascism or Communism, financial servitude or Political bondage, or both, are inevitable.

Social Credit is the only alternative. It is the Christian way, the Scientific way, the common sense way, the way of the Canadian way, the British way, your way, THE ONLY WAY.

Yours faithfully,  
NORMAN JAGGERS, Social Credit Candidate

Mrs. W. C. Lee and Family.

## Encourage Farmers To Plant Trees

To increase the general interest in farm tree planting on the Prairies, especially in the areas that have been affected by drought and soil drifting, the Prairie Farm Rehabilitation Advisory Committee will supply suitable nursery stock free of charge to farmers and give some financial assistance for certain special projects.

The policy of supplying individual farmers on the Prairies with free trees from the Dominion Forestry Stations at Indian Head and Sutherland, Sask., will be continued as in the past for the establishment of Farm Home Shelter Belts, and also where desired for field crop shelters or hedges.

Operators of all illustration Stations and District Experimental Sub-Stations will be given special assistance in order to develop schemes which it is hoped will provide model plantings in each district covered by these Stations. The trees will be provided free and express prepaid.

On Rehabilitation Areas the Prairie Farm Rehabilitation Advisory Committee will bear all costs of planting and maintenance where tree planting is considered necessary.

In order to secure reliable data on the value of tree belts and hedges in protecting cereal and forage crops resistance will be given to groups of farmers who will voluntarily organize for the purpose of planting Field Crop Shelter Demonstration Blocks. Such groups must agree to surround

and subdivide their fields with shelter hedges and also follow such cultural methods as may be considered best for the particular district and soil type. These blocks should be as compact as possible, should comprise from nine to twelve adjoining farms and be evenly distributed over the three prairie provinces in those areas where soil drifting and drought are the main problems.

Numbers of Agricultural Improvement Associations under the District Areas plan may secure free trees for home shelter belt plantings. The number of trees supplied to each farmer under the District Areas plan will depend on local conditions, with a maximum of 10,000 trees and cuttings per farm. Financial assistance in planting under supervision may be granted.

In areas selected for Township Demonstrations farmers will be given all possible assistance in planting farm home shelter belts and possibly some financial assistance; but details of such assistance have not yet been definitely settled.

All the tree planting work and projects will be under the direction of Norman M. Ross, chief Division of Tree Planting, Dominion Forestry Station, Indian Head, Sask., to whom requests concerning the details of the assistance to be given towards developing the different tree planting projects should be made.

## Alberta Cheese Takes Top Place

Alberta cheese leaped into the limelight for the first time in many years last week, when an exhibit of three entries from a cheese from a factory near Edmonton, in competition with such famous dairying areas as the Fraser Valley in B.C., took all three first prizes in the cheese classes at the Vancouver exhibition. The prize-winning Alberta cheese came from the factory at Buford, west of Leduc. The fact that the pioneer settlement was able to sweep the boards in the face of stiff competition from cheese factories of many years' standing in the coast provinces was widely commented on by dairy-men at the coast. The cheese-maker responsible for the production was Alton Kerr, who has been connected with the Buford factory for some time.

**NOTICE TO CREDITORS AND CLAIMANTS**  
IN THE ESTATE OF LUDWIG LARSON, late of Leduc, farmer, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above named Ludwig Larson who died on the 16th day of March A.D. 1934 are required to file with F. R. Riley, Solicitor for the executor of the estate of the said deceased by the 20th day of November A.D. 1935 a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.  
Dated this 8th day of October A.D. 1935.

F. R. RILEY,  
Leduc, Alberta  
Solicitor for the executor.  
Oct. 10-17

## Benjamin Franklin said:

A rich rogue is like a fat hog, who never does good till as dead as a log.

## PARTY HONOR RECENT BRIDE

At the home of Mrs. R. B. Thompson, Thursday evening a miscellaneous shower was held in honor of Mrs. Carole Jameson (nee Hazel Perkins). A mock bride and groom (Miss Fay Thompson and Doris Jameson) presented the recent bride with many elaborate gifts. Various games were played followed by a delicious lunch. The following were present:  
Mrs. Perkins, Mrs. Thompson, Edith Thompson, Fay Thompson, Emma Kahye, Evelyn Carlson, Betty Pingle, Vera Kabis, Hilda Armstrong, Myrtle Cook, Roberta Smith, Mrs. Rice, Luella Stock, Hazel McDonald, Florence Brivke, Blanche Perkins, Doris Danter, Gladys Rusk, Nettie Sage, Sybil Graves, Mrs. Matt, Mildred Frizell, Jessie Reddick, Mrs. Umbreit, Kay Craigen, Mrs. Craigen, Billy Umbreit.

The number of hogs in Canada for the 38 weeks of 1935, ended September 19, was 2,083,391. Of that number, 686,364 were graded at stock yards; 1,312,558 at packing plants, and 64,469 by carcass.

WORLD-HAPPENINGS  
BRIEFLY TOLD

Something new in the way of fresh wheat plants—a grown by W. F. McCallum, McCallum, Sask., farmer. A single spikelet of oats with two grains was found on a head of wheat about half way up the spike.

Smooth starting and stopping, and rapid acceleration are claimed for a new turbine drive engine with only coupling rods visible to appear shortly on the London and Scottish railway.

Struck in the eye by the sight on her gun from the recoil as she fired at a mountain goat, Mrs. P. A. Curtis, of New York and Bermuda, suffered the loss of the eye in hospital at Jasper, Alta.

An increase of more than \$1,000 over last year was reported for the Canadian National Institute for the Blind booth at the Canadian National Exhibition. Bales were \$7,908.88 compared with \$6,499.41 last year.

Stipends greatly below the rates fixed by the assembly regulations are received by large numbers of Presbyterian clergy in Montreal. It was reported at a meeting of the presbytery called to appoint a minister to a new church.

Henri Rivest, who describes himself as a "professional tipster" for insurance adjusters and pleaded guilty to setting eight fires in the north of Montreal, was sentenced to five years in penitentiary by Judge J. A. Metayer.

Invention of a wire screen similar to a dog muzzle in design to fit over automobile headlights as a protection from flying stones on gravelled highways has been patented in the United States and Canada by Noel F. Judah, of Edmonton, who has formed a syndicate for manufacture.

Premier Mitchell Hepburn of Ontario, on a western election tour, saw his first ranch, the 100,000 acre McIntyre ranch on the Milk river ridge south of Lethbridge, where 4,000 "white-faces" are run on a "farm" in which there are 145 miles of fence.

## The Automobile World

Over Thirty-five Million Cars Are In Use

The motorist who brags of 100,000 miles has still some distance to go to cover the world's highways. In a little booklet issued by the Automobile Manufacturers' Association, packed with unusual and interesting information, it is stated that there are 9,231,000 miles of highway in the world.

The United States has 3,065,254, one-third of the total. Soviet Russia is second with 1,882,100, and Japan, rather surprising in view of its small area, is third, with 694,626. Australia takes fourth place, with 468,231, and Canada is fifth with 409,124. At the other end of the scale is Gibraltar with 15 miles of road, and French Somaliland with 25. But Gibraltar has 66 cars to each mile of road, while the United States has only 8.3 per mile, and Canada 2.7.

According to the booklet, the average life of cars is 8 1/2 years. It is said also that 96 per cent of all cars sell for less than \$750 wholesale; that farmers use 26 per cent of all trucks; that there are 35,087,000 motor vehicles in the world, of which 71 per cent are in the United States; that motorists pay six times the taxes they paid 15 years ago; that in automobile deaths per 10,000 motor vehicles Canada has the second lowest standing in the world, with 9.1—second to New Zealand's 6.6—and Italy the highest at 64.5—Edmonton Journal.

## Probably Helped Business

Music Teacher Not Slow At Grasping An Opportunity

Paderewski arrived in a small western town about noon one day, and decided to take a walk in the afternoon. While strolling along he heard a piano, and, following the sound, came to a house on which was a sign reading:

"Miss Jones. Piano lessons, 25 cents an hour."

Pausing to listen, he heard the young woman trying to play one of Chopin's nocturnes, and not succeeding very well.

Paderewski walked up to the house and knocked. Miss Jones came to the door and recognized him at once. Delighted, she invited him in, and he sat down and played the nocturne as only Paderewski can, after waiting spending an hour in correcting her mistakes. Miss Jones thanked him and he departed.

Some months afterward he returned to the town, and, looking at the sign, read:

"Miss Jones. Piano lessons, \$1 an hour. (Pupil of Paderewski)."—Montreal Star.

Five Months For Two Minutes Two minutes is only a short time but it is expected that a party of astronomers will leave Britain and go to Japan to view a total eclipse of the sun on June 19 next year. Should the party leave they will be away for five months for an eclipse which will last two minutes.

The ending of a play running in London has been altered. A capricious critic complains, however, that it hasn't been put any nearer the beginning.

## Still Making Statues

French Artisan Produces One Of Joan Of Arc Every Week

Forty thousand statues to a single individual, breaks the record in France. The individual is Joan of Arc, the girl warrior who was burned at the stake in Rouen 504 years ago, and who was made a saint 15 years ago.

Every city and nearly every church has its statue of Joan of Arc. There are 38,000 communes or townships in France, and each one has at least one statue to the young French heroine.

Orleans, which Joan of Arc delivered from the English in 1429 and where a "procession of gratitude" is held every year has more statues than any other city. There are more than 200 there in the Joan of Arc Museum alone which vary in size from one or two feet in height to live-size statues. Some are of granite, marble and bronze; others are in glass, china and wood. There are monuments to the Maid of Orleans in Rouen, where she died, and others at Domremy, her birthplace.

In all, there are a minimum of 40,000, and according to a Paris bronze founder the number of statues is constantly increasing. This artisan says he produces at least one statue of Joan of Arc every week. The next French person to be honored is Napoleon Bonaparte, who according to statistics runs a close second to Joan of Arc in the number of statues erected in his honor.

## Intense Heat Surrounds Moon

Temperature Is Estimated To Reach 1,000 Degrees Centigrade

Man will never be able to reach the moon, says Prof. E. V. Appleton, chairman of the British National Committee for Radio Telegraphy.

Professor Appleton advanced the theory that in the upper atmosphere encompassing the earth there is a vast layer of intense heat hitherto unknown to science.

Appleton was quoted by the London Daily Mail as asserting this "celestial inferno" of a temperature of 1,000 degrees centigrade constitutes an impassable obstacle to the age-old ambition of shooting a rocket with a human cargo to the moon.

The scientist, who discussed his discoveries with members of the Royal Society before his announcement, said the disclosure of a fiery globe-encasing band would upset the whole system of researches now being carried out by radio short waves as well as the possibility of harnessing micro-waves for radio transmission.

Prof. Appleton also contended he has upset the theory that the atmosphere grows colder the farther one travels from the earth. He asserted the opposite, becomes increasingly hotter after the first seven miles. He based this conclusion on calculations he made by sending wireless waves into the atmosphere 150 miles from the earth.

There, he said, the waves struck what he called the ionosphere, and were reflected back toward the earth.

## Fruit And Vegetable Canning

Industry Carried On In Ontario, Quebec And British Columbia

Fruit and vegetable canning in Canada is carried on most extensively in the provinces of Ontario, British Columbia and Quebec, where climatic conditions are favourable for the growing of fruits and vegetables. The principal fruits canned in Ontario are: apples, pears, plums, peaches, cherries, currants, gooseberries, blueberries, raspberries, strawberries. In addition, British Columbia has the apricot and the loganberry. The vegetables canned include: tomatoes, peas, corn, beans, beets, carrots, pumpkin, squash, spinach and asparagus. The canning season begins in June and continues through the summer and autumn until October, being at its height in July, August and September.

## Motor Accidents

Red Cross First Aid Stations For Highways In U.S.

The Rochester Democrat Chronicle says: The Red Cross announcement that 15,000 first aid stations will be set up along principal highways to aid victims of motor accidents is a confession of a condition that shames modern civilization. The Red Cross action is timely and necessary, its wisdom is clear; but the shame lies in its necessity. It recognizes the motor car as a destructive force and its destructiveness lies not so much in the weight of its metal body and the power of its cylinders as in the careless use or reckless misuse of the finely adjusted control mechanisms that have accompanied every development of weight and power.

Fruit Imported By Canada

Canada, the United Kingdom, France, Germany and Austria are leading world importers of fruit. Canada does not require to import apples, but the average annual import of other fruits into Canada from 1928-32 included 74,000 tons of bananas, 73,000 tons of grapes, 20,000 tons of dried grapes, 12,000 tons of lemons, 11,000 tons of grapes, and 8,000 tons of pears.

A sparrow flaps its wings nearly 800 times a minute.

## HONORABLE PIONEERS

What Is Worth Most To Canada, Live Or Dead Attractions?

(By Jack Miner)

What is worth most to the people of Canada, live or dead attractions? The first to be considered is what is the best for the most people. Figures show that in North America, less than ten per cent of the population use a gun while the other 90 per cent want to see birds and mammals alive and only shoot with kodaks. The gunners take all from the 90 per cent, while the 90 per cent take nothing from the shooters, but are constantly building up their sport.

While I am not talking politics, yet Canada has wisely used the unemployed to build good roads through our north country or vast natural parks and I say without hesitation that one family of our big white-tailed deer bounding across the highway and possibly stepping into the range of the tourist's kodak and movie camera is worth more to more people of Canada than 25 dead deer hanging back in the woods or even hanging dead in sight of our tourists and reminding them of the living sights and pictures as good as golden wheat fields dollars and cents among our rocky picturesque country. Yes, I say \$100 brought into Canada by tourists is just as good as \$100 made by the hunters out of Canada. Moreover it is apt to be distributed among people who need it most, and it is the most of all, live attractions are self-advertising. For illustration, tens of thousands of people go to Yellowstone Park in the United States and they spend tens of thousands of dollars and they get out of it the pictures of the bears and other live attractions. Yet these photos and movies cause thousands more to go to the park and see the most attractive animals Canada has to-day, and if given a chance would be placed in our camp, and be placed in this land. Very true, he is mischievous, but no comparison to a picture of a bear. The picture is the garbage from the hotels in a small city or town in the North, or even in our camp, can be placed to bait them where the public can picture them nearly every day in the sun, and they will not go to the big cities at our front or side door to the United States.

Yes, a bear did strike a man in Yellowstone National Park, but it was a Scotchman who gave the wild bear a candy and then wanted to take it away from him, but the bear wouldn't stand for it and knocked Sandy over the log and that is all there was to it, but he was eating the candy.

These common black bears in Ontario are practically as tame as other game such as deer and moose. As proof of this moose were so scarce in Ontario that the government did not allow an open season on them in that province until the fall of 1900. As proof of the scarcity of moose in Ontario, the Ontario hunters like myself went to Quebec to hunt them.

The big fair closed with 151,000 persons attending the impressive closing ceremonies. Total attendance for the two weeks of the exhibition was 1,051,000, an increase of 148,000 over last year. Officials estimated retail and wholesale purchases were 32 per cent higher than any year since 1928. The number of foreign buyers was twice that of any previous year.

## C. N. Exhibition

Most Successful Year Since The Peak Held Of 1928

Directors of the Canadian National exhibition reviewed the most successful exhibition from a business standpoint since the year of 1928. The big fair closed with 151,000 persons attending the impressive closing ceremonies. Total attendance for the two weeks of the exhibition was 1,051,000, an increase of 148,000 over last year.

Officials estimated retail and wholesale purchases were 32 per cent higher than any year since 1928. The number of foreign buyers was twice that of any previous year.

## McGill Research Fund

As result of a bequest of \$83,000 by the late Mrs. Blanche E. Hutchison, of Montreal and Victoria, B.C., a new medical research fund was established at McGill University, Montreal.

## Linen For Airplanes

Extensive orders for aeroplane linen for civil and Government aeroplanes have been placed recently in Belfast. Not since the war have so many looms been kept busy with this branch of manufacture.

## Household Arts

by Alice Brooks

"Isn't your horse winded?" "Yes, he's a draft horse."

PATTERN 5426

The individuality of this crocheted shirtmaker blouse doubles its charm, and when you find how easy it is to make, you'll want to go right on and crochet a plain skirt for it, too (pattern 5535). Then you'll have a two-piece ensemble to wear right through the Fall and Winter. The lacy stitch which composes the entire blouse is very quickly learned by heart, and a grand one to add to your crochet repertoire. The blouse has raglan sleeves, which are so easy to make, while the pretty bow is made of strands of the same wool. The buttons make a smart trim, and sleeves may be either short or long.

In pattern 5426 you will find complete instructions for making the blouse shown; an illustration of it and of the stitches needed; material requirements. The blouse comes in size 16-18 and 38-40. Price of pattern 20c.

In pattern 5535 you will find complete instructions for making the skirt shown; an illustration of it and of the stitches needed; material requirements. Price of pattern 20c.

To obtain these patterns send 20 cents each (40 cents for both) in stamps or coin (prefered) to Household Arts Dept., Winnipeg News-paper Union, 176 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

## Tourists Attractions

What Is Worth Most To Canada, Live Or Dead Attractions?

(By Jack Miner)

What is worth most to the people of Canada, live or dead attractions? The first to be considered is what is the best for the most people. Figures show that in North America, less than ten per cent of the population use a gun while the other 90 per cent want to see birds and mammals alive and only shoot with kodaks. ## A Waste Of Money

Speeding Uses Up Much More Gasoline And Oil

The toll of human life taken by reckless driving on our highways; the injuries and inconveniences due to unnecessary speed, are forceful enough arguments in themselves to urge caution on motorists. And the United States Bureau of Standards has compiled significant data to show that speeding is also a waste of money. In that the faster an automobile is driven the more gasoline it consumes.

A car capable of getting 18 miles out of a gallon of gasoline, when driven 30 miles an hour, for example, will get only 15.4 miles to the gallon, according to the bureau figures, when pushed up to 40 miles an hour.

At 50 miles an hour the same car will get 14.6 miles to the gallon, at 60 miles an hour it will get 12.6 miles, and at 80 miles an hour it will get 8.6 miles per gallon.

In addition to this, nearly seven times as much oil is used up at 55 miles per hour as at 30 miles an hour. These are facts well deserving of publicity.—Hamilton Spectator.

## The Manx Language

Only One That Does Not Contain Swear Words

Interest in the Manx language, which has been on the verge of extinction, is being revived by the Manx Society, composed of ardent nationalists of the Isle of Man. When the last Manx census was taken, four years ago, 529 persons could speak in Manx, but 60 per cent of them were then over 65 years of age. A peculiarity of the Manx language is that it contains no swear words. How Manx gofers were able to relieve their feelings a few years ago, when the language was generally used on the island, is being asked by those against the new movement who contend that perhaps that may be why Manx has gone out of use.

## Prince Is A Mason

Was Recently Installed As Worshipful Master Of Lodge

Overseas Daily Mail says the Prince of Wales was installed as Worshipful Master of the Masonic lodge "Friendship and Harmony." The ceremony took place at Oatlands Park Hotel, near Weybridge, and was performed by the immediate past-master, Mr. R. A. B. Powell.

After installing the other officers of the lodge the Prince presided at the dinner which followed, when the toast of his health was proposed by the deputy master, Sir Stanley Maclean.

## Durum Wheat

Will Be Marketed And Dealt With By The Canadian Wheat Board

All durum wheat grown in western Canada this year will be marketed and dealt with by the Canadian wheat board in the same way as ordinary wheat, Prime Minister Bennett stated in answer to queries which he said had come to him from many quarters.

Durum wheat is used mainly for macaroni-making and other processing rather than for milling purposes.

## Montreal Banker

Sir Gerald Aylmer Succeeds To Baroncy

To the list of Canadian baronets was added recently the name of Sir Gerald E. F. Aylmer, retired branch manager for the Bank of Montreal. He resides in suburban Westmount.

Sir Gerald succeeds in the baronetcy his first cousin, Sir Fenton Aylmer, V.C., of London, who died without issue.

Sir Gerald was created in 1921 and Sir Gerald is the 14th baronet.

## Success Through Failure

It is a mistake to suppose that men succeed through success; they much oftener succeed through failure. By far the best experience of men is made up of their remembered failures in dealing with others in the affairs of life. Such failures in sensible men incite to better self-management, and greater tact and self-control, as a means of avoiding them in the future.

## Measuring Space

Astronomers can measure accurately distances up to 300 trillion miles, states Dr. F. C. Jordan, Pittsburg, treasurer of the American Astronomical Society in convention at Toronto. With a fair degree of accuracy, distances up to 600 trillion miles can be measured, he added.

## Sunlight Is Trapped

Ingenious Device Ensures Full Benefit Of Sun's Rays In The Home

In a block of flats now being built in London, sunlight is being "laid on."

Not just sun-ray lamps or artificial sun-ray apparatus, but real sunshine, so harnessed that it switches itself on as soon as the sun appears, and switches on the electric light as the sun disappears.

This is the first installation in England of an ingenious device invented by a French engineer, Jacques Arthuis, which puts sunlight "on tap" for domestic lighting.

The device enables every room in a house, including the darkest cellar, to be efficiently lighted by the rays of the sun, even with blinds drawn across the windows, or even if there are no windows.

This is achieved by an arrangement of mirrors and lenses. Up on the roof there is a big mirror mounted on a slowly rotating axis, operated by a tiny 1-horse-power motor.

A mercury thermostatic device, worked by the heat of the sun, controls the motor and thus keeps the mirror moving just enough to make it follow the sun across the sky—so that it is always receiving the direct rays over its entire surface of 40 square feet.

These rays are reflected by another mirror fixed at an angle that will deflect them down a vertical shaft to the basement. At the height of the ceiling in each room are mirrors, so arranged that a number of descending rays are trapped as they reach each storey and deflected to the ceilings of the rooms surrounding the shaft.

The rays are then finally deflected from room to room through small apertures in which mirrors are set. Should the sun go behind a cloud the mercury in the thermostat begins to fall. That action is sufficient to switch on the electric light.

To make the efficiency of this apparatus complete all the mirrors are polished automatically by an arm which operates from the main motor. This wipes each mirror over after one complete rotation of the central mirror on the roof.

## To Banish Horses

Busy London Thoroughfares To Be Closed To Horse-Drawn Traffic Soon

London, England, is to be conspicuous five years hence because of the absence of horses from the streets, according to present plans of the ministry of transport. It is intended to inaugurate a completely mechanized system of transport, of which will be in operation in the near future. The busiest thoroughfares are to be closed to horse-drawn traffic shortly. While the minister of transport, Mr. Hore-Belisha, has the power to put an end to traffic by horses, he doesn't wish to do so without giving the owners fair warning.

In any event a percentage of the animals will be able to "pinch-hit" on the farm. Others can retire to meadow and pasture for deserved rest. The occasional one may even be developed into a steeple-chaser or flat runner for the enjoyment of racing fans.

Machinery and modern invention have replaced Old Dobbin in many spheres, but we doubt that he will fade from the picture entirely for a long time yet.—Windsor Star.

## Egg Shells Are Useful

Will Remove All Traces Of Discoloration From Bottles

Egg shells should not be thrown away. Wash them, see that they are thoroughly dry, and store them in an air-tight tin until they are needed. They are admirable for cleaning bottles. Crush the shells to a powder, put a liberal supply in the bottle to be cleaned, add soap flakes and a little warm water, and shake well. Rinse first with warm water and then with clear cold water, which will move all traces of dirt and discoloration. Leave the bottles upside down to drain.

## Has Driven Million Miles

A million miles in a car is the record of Eva Jordan, who began to drive a car when she was 52 years of age and has used 14 cars, has covered 1,000,000 miles in 12 years without an accident. She carries State patients from all parts of Iowa to the State University Hospital at Iowa City.

Alexander the Great was born in Europe, died in Asia, and was buried in Africa.

# Malt Money

It is no wonder that the malt is so popular. It is a food that is easy to digest and gives a pleasant taste. It is also a good source of energy and is suitable for all ages.

Wonderful new Children's Picture Book free. Depicts strange and colorful scenes from all over the world.

Cooking Ovens: Windsor Salt in every cooking oven. Cooks better.

Prevent your children from getting salt poisoning. Use Windsor Salt in every cooking oven.

Without children please send special Children's Booklet, "Malt All over the World".

## MISS ALADDIN

By—  
Christine Whiting Farmer  
Author of  
"One Wide River to Cross"  
"The Unknown Port," etc.

### SYNOPSIS

Nancy Nelson is a sub-deb, a girl, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill, and obtain a view of the surrounding landscape and miss the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been better to help out while Luke's leg gets better. With Jack away, Nancy thinks that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge comes into her mind. She writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbine residence all lit up, and asks Matthew if he knows why. He says: "Let's go in and see." Then Nancy learns that she is having her debut, but in a different setting than had been planned for her in Boston.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

### Now Go On With The Story

#### CHAPTER XVI.—Continued.

It was that evening, seated before a crackling hearth-fire at the Adam ranch, that Cousin Columbine told them the story of the Pempton hoax. Jack had been asking about a pathetic little cemetery he passed one day when doing an errand for Mr. Adam.

"It's on a hillside back from the road," he told them. "Most of the graves seem to be children's and unmarked. Was there ever a smallpox epidemic in these parts, Cousin Columbine? It seemed strange finding a cemetery way out there."

"He means that little burying ground near West Creek's town," responded Jack.

"Do you recall a mile or so farther on, passing a dwelling house and two ramshackle buildings that looked fit to collapse at the first high wind?" asked Cousin Columbine.

Jack nodded, and the old lady continued: "Those buildings, and that wretched cemetery, are all that remain to tell the tale of a prodigious hoax which was planned and carried out successfully by old Marah Penn."

"When using WILSON'S FLY PADS, READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY."

Each pad will kill flies all day and every day for three weeks. 10 CENTS PER PACKET at Drugists, Grocers, General Stores. WHY PAY MORE? THE WILSON FLY PAD CO., Hamilton, Ont.

thousand dollars, I was told), and that small burying ground where lie the bodies of those who were too frail to survive the rigors of frontier life."

"I'd like to see that place," said Nancy, as Cousin Columbine ceased speaking.

"You shall, my dear; and we'll make an excursion out on the plains as well. They can be so beautiful, our western prairies, that I hate to think how cruel they sometimes are."

"Cruel?" Nancy questioned, a little puzzled. "You won't take sudden blizzards when the grazing cattle have no shelter? Well, this winter's over, Cousin Columbine, and if you've no objection I'll start getting acquainted with the plains to-morrow. I've got a marvelous idea. Why can't I ride to Prairie House with Jack and Matthew? It would be a lark."

"You're a new woman, Nancy Nelson," remarked her brother, "if you regard as anything like a lark the necessity of plugging out of bed with the wind. We'll pass your tower at five a.m., young lady. Do you think you can make it?"

"Of course she'll make it," put in Matthew eagerly. "We'll get lunch at Uncle Tom's, Nancy. It'll be busy having you along."

Thus it was settled, though on the rich home that Cousin Columbine predicted a change of weather. Despite this prophecy the sun was shining when Nancy awoke, dressed rapidly, and slipped downstairs on tip-toe; but as she passed the lower bedroom a call arrested her.

"That you, Nancy?" called the door. "Did I wake you up? You were wrong about the weather, Cousin Columbine. It's a lovely morning."

"What are you wearing?" "My knitted sport suit. I dare say I'll have time to take your fur coat, Nancy. I shan't have an easy moment all day long."

"My fur coat? Why—?" "Don't argue," snapped the old lady. "I know this country better than you do. I've seen days start out like this summer time of year, and end with a snow storm. I'm responsible to your parents for your safety; child; and I—I command you to take that coat."

Nancy laughed, realizing that there was no use in combating an old lady so recently.

"All right," she said, good-naturedly, "the coat goes along as an extra passenger. I'll run up for it now."

"What sort of stockings have you got on?" "The question caught her at the door, and the girl turned, a bit exasperated.

"Don't let that worry you! I'm wearing sport shoes and woolen hose. I shan't freeze to death, Cousin Columbine, even if we get one of your spring blizzards."

She was surprised to note that this absurd remark was taken seriously.

"Look here, child, don't you start home in any sort of storm. Remember that. You think me foolish no doubt, but I've seen a drift two feet of snow later than this, and herds of cattle frozen in the goods out on that prairie. Close my window, Nancy. I may as well get up and see what's happening."

She was on the porch when they rode away, a troubled look in her unusually placid eyes. She remembered afterward that she had taken her sheep-lined coat—looked up at the sky, and said at the last moment: "I sort of wish you wouldn't go. There's something in the air this morning that I don't like."

"Now don't you worry, Miss Columbine," soothed Matthew. "If there's the least suspicion of bad weather, I'll be right there to save at Uncle Tom's until it's over."

This seemed reasonable; and as they waved good-bye to a robin hovering down from a spruce tree and began his breakfast at Miss Columbine's big board. But even this emblem of the springtime failed to cheer her.

"I ought to have set my foot down," she said soberly when Aurora Tubbs arrived an hour later. "I don't like this air."

The sun played hide and seek all morning, and at last retired behind a cloud and stayed there. At noon a wind sprang out of the north, rattling the shutters of the Nelson mansion with sudden fury; and ten minutes later a blizzard of snow had shut them in. Columbine Nelson kept going to a window and staring out. Her lunch was left almost untouched. Twice she sat down at the telephone and then turned away, knowing that if there were anything to say Eve Adam would have called her.

The storm increased; and at half past four, after moving restlessly about the house, Miss Columbine stood alone long and listlessly, that Aurora, who had been curiously silent during those dragging hours, burst out: "Don't you keep fretting, so, Miss Columbine. It makes me nervous. Didn't Matt Adam promise they wouldn't start if it was stormy in?" And besides, Mark'll be with 'em on the way back, and he'll reel 'em headed home an emergency."

"That's what I've been telling myself all day," replied Miss Columbine.

## Regular Painting Pays

Farm Buildings Look Better And Do Not Absorb Moisture

Good looking farm buildings create a feeling of respect and confidence among those with whom the farmer deals in business. They serve also as a stimulus in keeping the owner alert and careful in his work. The cleanliness of the cow stables and milk houses is an incentive to neatness of person and the sanitary treatment of dairying equipment.

A gallon of paint is something more than just fresh color for the buildings. For one thing, exterior painting aids in preventing the penetration of moisture. In a damp, unpainted building, birds and beasts, like humans, are apt to catch cold. Moisture does not readily enter wood sealed with a protecting paint coat. Thin as it is, the paint film keeps the wood from absorbing the moisture from winter snows and spring rains. Periodic painting wood, thus preventing cracks and breaks which may eventually cause harmful drafts.

It pays to have farm property painted regularly. But to reap the full rewards from this practice, the owner must see that the job is well done. Poor paint and careless methods are a waste of money. The advantages of good materials lie in greater coverage and longer span of life.

## Escaped in Air Liner

Australian Convict Fled As Son Of Prison Warden

Police all over Australia were looking for a prisoner who stroled out of Brisbane jail and escaped swiftly and luxuriously in an air liner.

The prisoner was employed as a kitchen-hand in the superintendent's home.

He found a suit of clothes belonging to the superintendent's son. It contained money and a motor car license.

Within two minutes he was adjusting a neat and unobtrusive tie in front of the superintendent's mirror.

A few seconds later, dressed in the complete outfit, he stroled past the unsuspecting guards at the prison gates.

Next he made his way to Archerfield Airplane.

He introduced himself as the son of the prison superintendent, booked to Toowoomba, fifty miles away, and took his seat in a waiting air liner.

## Straws Of Cellophane

Another Use Has Been Found For Cellulose Film

Chalk up another one to the many thousand uses of cellophane. Not as a wrapper this time, but as straws through which to sip your favorite drink.

Made from this multicolored cellulose film, the straws are claimed to be the latest supplement to a current fashion of serving cooling drinks in vast-colored glasses for parties and outdoor.

Alcohol doesn't disintegrate the cellophane straws, so they are equally usable with soft or hard drinks. Completely tasteless and shape retaining (they won't collapse on you), they are said to be ideal for sipping from.

Children get a new pleasure out of drinking milk with them, it has been observed.—Washington Post.

## Provides Work

Sir John Jarvis Purchases Boat To Give Jobs To Shipbreakers

Sir John Jarvis, a British sportsman, bought the liner Olympic from the Cunard-White Star line to make work for shipbreakers at the "ghost town" of Jarroo.

Sir John, wealthy printer and publisher who founded the Surrey fund for helping the town of Jarroo, paid more than \$100,000 for the ship. He here he said to be ideal for the same price to a company establishing a shipbreaking industry at Jarroo.

Wrecking of the Olympic was expected to take 18 months and mean payment of \$100,000 in wages there.

## A Noiseless City

New York To Take Measures To Ensure Quietness

New York City must stop making so much noise. Auto horns must stop bleating; radios, radios, and riveting must be tuned down; trucks must cease rumbling.

So demanded city fathers who tip-toed for city hall to officially open a quiet but concentrated war on noise.

"Not another foot of elevated track will be constructed in my time, and many miles of it will be torn down," promised Mayor LaGuardia, as his contribution to a noiseless city.

## Japs Use Barbed Wire

A high barbed wire fence surrounds the roof of nearly every Tokyo department store. It's because those tall buildings had become a favorite spot from which Japanese suicides jumped in droves—till the fences put an end to the vogue.

Still, a horse wasn't worn out by the time we got it paid for. Robert Bruce, the Scottish king, was a leper.

## DON'T RISK BAKING FAILURES . . .

"DON'T TAKE CHANCES WITH INFERIOR BAKING POWDER. LESS THAN 1/2 WORTH OF MAGIC MAKES A FINE, BIG CAKE. AND MAGIC ALWAYS GIVES GOOD RESULTS."

and MISS KETTEL CHAPMAN, popular cookery editor of The Farmer.

Leading Canadian Cookery Experts warn against trusting good ingredients to inferior baking powder. They advise MAGIC Baking Powder for perfect cakes!

CONTAINS NO ALUM.—This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient. Made in Canada.

Would Reduce Accidents It Drivers Of Cars Made Courtesy

A Habit The number and character of automobile accidents occurring lately give point to the following comment in a weekly exchange:

"Science and industry have done their part in producing the automobile. Paul du Kruit, in a recent article in the Rotarian Magazine, declares that 'hardly more per cent. of all accidents can be laid to automobile defects.' The culprit is the driver. Collectively, he has not yet mastered the new device, has not yet adjusted his nervous organism to its demands, has not yet mastered the technique of making this invention a part of his social routine with economy of human waste. He is, in short, not yet civilized."

"The driver too often does not know the driving customs and regulations. Lacking sure knowledge of how to signal, he falls to give any intimation to the driver behind—such as putting a hand out—that he is about to do something other than proceed straight ahead. He will 'just this time' pass a car on a curve or near the crest of a hill. He will take the inside lane, and his self speed on through."

"But to sum all, he lacks courtesy. The vital core of courtesy is consideration for other people. Courtesy is the new device, has not yet adjusted his nervous organism to its demands, has not yet mastered the technique of making this invention a part of his social routine with economy of human waste. He is, in short, not yet civilized."

Results of recent research work at the University of Alberta in connection with analysis of market milk carried on by Dr. H. R. Thornton and Dr. R. B. Sandin, of the Department of Chemistry, will be presented to the annual meeting of the American Public Health Association at Milwaukee, for where Dr. Thornton left this week.

The work done at the University at Edmonton has a considerable bearing on the testing of the milk supplies of Calgary and Edmonton. The American Public Health Association have evolved standard methods for the analysis of market milk and one of their methods of bacteriological analysis is used for testing the milk supplies of the Alberta cities. As a result of the investigation at the University of Alberta this test will be made more accurate than heretofore.

While in Milwaukee, Dr. Thornton will be a guest speaker at the annual convention of the International Association of Dairy and Milk Inspectors. The president of this organization is Mr. C. K. Johns, assistant Dominion agricultural bacteriologist, who is a graduate of the University of Alberta. Recent investigations in the Department of Bacteriology by Mr. N. J. Strynadka, M. Sc., have shown that milk as it exists in the udder of the cow harbors many more bacteria than has been suspected. These results, which are to be discussed at this convention, were obtained by a much more extensive microscopic examination of such milk than had previously been attempted.

### Old Timer Passes Away

William Clifford Lee, a resident of Lacombe for the last 2 years, passed away at his home Tuesday, October 2, at the age of 76 years. Mr. Lee was born on December 7, 1858 at Owen Sound, Ont.

On Sept. 1, 1930, he was married to Ida Thorne. He is survived by his widow, Mrs. Ida Lee, and four sons, Russell Gordon of Wallaceburg, Ont., William Lloyd of Youngstown, Ala., Ernest Eugene and Arthur Stanley of Lacombe, Alta., and eleven grandchildren, and two great grandchildren.

Mr. Lee had hosts of friends and acquaintances in Ontario and in this neighborhood, whose sympathy is extended to the family as the deceased was respected by all. Mr. Lee for a number of years was master mechanic at Pryx Lodge A. F. and A. M. No. 112 and Sombra Chapter R.A.M. of Wallaceburg, Ont. During his life he has attended the Presbyterian church. Funeral services were held at the home of the deceased, Thursday afternoon, the Rev. Layton and Rev. Wain officiating. The local Masonic Lodge had charge of the service.

## Butter for Export Stabilization Scheme

Further assistance to Canadian dairymen is the aim of the Butter Export Stabilization Scheme just officially approved.

Statistics indicate that the stocks of butter in storage on September 1, 1935, were approximately \$200,000 pounds in excess of the five-year average and as the current production is larger than last year, further increases in the surplus will be the result of unless some action is taken. The purpose of the scheme is to facilitate the export of butter to the United Kingdom, where, at the present time, it appears, a favourable market exists. This action is intended to relieve the butter market in Canada and, in so doing, strengthen the price of butter fat sold in milk and cream by dairymen throughout the Dominion.

The scheme provides for the marketing or the regulation of the marketing of butter for export. Agencies may be designated through which the butter is to be marketed. Where necessary, exporters may be compensated for losses incurred through export transactions.

The scheme will be administered by a Local Board consisting of J. F. Singleton, Dairy and Cold Storage Commissioner, Dominion Department of Agriculture, who will be Chairman of the Board; L. D. Wilgus, Director, Commercial Intelligence Service, Dominion Department of Trade and Commerce, and Allan C. Fraser, Ottawa, Secretary Manager of the National Dairy Council.

The combined production of all kinds of concentrated milk in Canada during August 1935 was 10,738,753 pounds as against 9,622,441 pounds in 1934. The statistics are based on returns from the 31 companies which manufacture any of the various items of concentrated milk, that is condensed milk (sweetened, skim, buttermilk), evaporated milk, milk powders, casein, and sugar of milk.

## WINNERS!

Wheat Growers, as individuals, are helpless. They require a strong and courageous organization to give aid when most needed. The Wheat Pools have been the consistent supporters of the growers' interests. The Pools have reduced costs, narrowed spreads and shown the way for fair and equitable dealings. The Pools have borne the brunt of the battle against ruinous price levels.
